

Announcements 2/24

- first paper critique
 - 3-level grading scheme (–, ✓, +)
- second paper critique is due on Tuesday 3/1
- same format as last time
- advice
 - in discussing strengths/weaknesses/extensions focus on the computational method, not the experiments, presentation or a different biological application
 - write more than 1-2 sentences when discussing your proposed extension; describe what challenges/issues would come up in carrying out your extension; briefly discuss how you would address these
