Announcements 3/22

- reading assignment:
  - Segal et al., *Nature Genetics* 2003
  - Yeang et al., *Journal of Computational Biology* 2004

- project progress report due on April 5
- progress report should cover the following items
  1. the status of your implementation
     - which algorithms
     - % complete
  2. the status of your data sets
     - give specific details on the data sets to be used in your experiments
     - resolve all issues with your data sets now -- make sure you understand your data sets and have manipulated them into an appropriate format
  3. a summary of the specific experiments you will do
