

# Announcements 3/28

- HW2
  - Implementation details will change AUC ROC
  - Email Li if you
    - Rounded mutual information before sorting edges
    - Plotted points on ROC curve at each unique mutual information value instead of each line
- Projects
  - Start immediately
  - Progress report due 4/13 will assess whether
    - You responded to feedback on your proposal
    - You have all necessary resources and initial progress
    - You are likely to complete the project on time

# Announcements 3/28

- HW3 released today, due in two weeks
  - Shorter assignment, less weight than others
  - Train and understand convolutional neural networks for regulatory genomics: [DragoNN](#)
  - Don't wait until deadline, servers will be busy
- Midterm
  - Grade distribution lower than previous years
  - Will adjust grades when computing final course grades
  - Review solutions
