Cancer Bioinformatics (Spring 2015)

Biostatistics & Medical Informatics 826 / Computer Sciences 838

Project Status Report Template

Project status reports should be brief (a single page is fine) and contain the following information:

Group members

Progress: What steps have you taken toward solving your problem thus far? This could include reading papers, cleaning data, implementing new methods, and analyzing data. Are your preliminary results consistent with your expectations?

Deviations from proposal: If applicable, describe how your goals and plans have changed since the initial proposal.

Anticipated challenges: What do you foresee as the major obstacles that could prevent you from achieving the goals stated in your proposal?
